

Simplify your construction firm's employee expenses

Trimble's Viewpoint Enterprise resource planning (ERP) helps construction companies manage their resources more effectively. But even with a sophisticated, industry-focused ERP solution, managing employee spend can be complex without robust tools in the field.

Emburse integrates directly with Trimble's Viewpoint Spectrum, ensuring employee expense data exports into the ERP automatically. It handles cost allocations and approval workflows as staff move between projects. With a two-way sync, users can expect faster expense reconciliation and a drastic reduction of errors.

Better together

Emburse Chrome River's automated expense and accounts payable solutions provide rapid value to your firm. Intelligent workflows simplify complex approval flows and remove the guesswork from your processes.

Employ automation from anywhere

Cut your expense and invoice processing times in half, enable work from any jobsite, and significantly reduce manual efforts by employees.

Leverage visibility to control expenses

Gain a complete overview of spending to control cash flow better, monitor trends to control costs, and make more informed policy decisions.

Ensure compliance without effort

Built-in controls keep spending within policy while catching duplicates, eliminating errors, and ensuring the accuracy of billable expenses.

Simplify expenses and control spend

We're making it easier for construction companies to manage their expenses and control spending with this Viewpoint Spectrum and Emburse Chrome River integration, powered by Trimble's Data Xchange team. Here is look at the data mapping:

Expense Coding Data → Entity/Entity Type/Allocation

This feature brings expense coding data such as jobs, phases, cost types, GLs, equipments, cost codes, etc., from Trimble Viewpoint Spectrum into Chrome River for selection on expense reports.

PR Employees → Person

This feature brings active employees from Trimble Viewpoint Spectrum's PR module into Chrome River as users/persons.

AP Vendor Invoices ← Exported Expense Reports

This feature brings exported expense reports from Chrome River into Trimble Viewpoint Spectrum's AP Invoice module, with attachments.

Solutions that grow with you

We take a holistic approach to building scalable solutions that adapt to your firm. The Emburse Ecosystem constantly adds new product enhancements to keep our customers ahead of their peers.

“ Thanks to Trimble Data Xchange, Viewpoint customers can now confidently consider Emburse Chrome River for their expense management without major concerns about its ability to connect with and act as an extension of their accounting system.
